EXPERIENCE**Grinnell AppDev** grinnellappdev.com

Co-Leader & Head of Android Development - March 2013 - Present

- Lead, motivate, and educate a multidisciplinary team of students dedicated to producing useful mobile applications for the Grinnell College community.
- Work closely with iOS team in all stages of development for each application.
- Expand group from 8 to 25 active members, manage \$120,000 in funding.
- Establish and implement new developer training program and Android curriculum.
- Manage development and maintenance of 7 apps in production on the Google Play Store.

Critical Ideas, Inc. voyse.me

Co-Founder & CEO - February 2014 - Present

- Manage startup based around Voyse, an encrypted, self-destructing voice messaging app.
- Engineer the application for Android, in collaboration with the concurrent iOS development.

DASIL: Data Analysis and Social Inquiry Lab dasil.grinnell.edu

Student Data Scientist - January 2015 - Present

- Query and parse data using a variety of RESTful apis.
- Engineer custom backends on which to store and analyze data.
- Create front-end web interfaces for data presentation and exploration.

MIT Global Founders' Skills Accelerator: Hecuba Group, LLC hecuba.exposure.com

Mobile Developer - Summer 2014

- Develop Android application to connect rural health organizers with local doctors.
- Work with international team to design and build the app with the goal of improving maternal health in rural Ghana.
- Optimize application to perform well in West Africa, where internet connectivity can be slow or non-existent.

SKILLS

- Full-stack developer, familiar with 10+ programming languages.
- 3+ years of experience in Android development, 7 apps published in the play store.
- Develop iOS apps in Swift, integrating Objective-C libraries.
- Build webapps and data visualizations using Angular.js, jQuery, D3, and Bootstrap.
- Engineer application backends and APIs using Node.js, storing data in mongoDB databases.
- Integrate with APIs such as Facebook, Instagram, Google Maps, Uber, and Parse.
- Iteratively design, prototype, and perform usability testing on user interfaces.
- Develop software collaboratively, using the Agile methodology and Git version control.
- Evaluate and work with unfamiliar code bases.
